PROFESSIONAL SUMMARY

Proactive Software Test Engineer with 6+ years of experience in enhancing product stability and efficiency through strategic testing and automation. Skilled in backend infrastructure, test coverage, and troubleshooting, with a proven ability to mentor junior SDETs and QAs. Passionate about delivering quality software through collaboration and continuous improvement.

EXPERIENCE

QA Engineer, Interswitch

September 2024 | Nigeria

- Automated testing of payment endpoints using advanced Postman scripts, integrated into Bitbucket pipelines, reducing regression testing time by 200% and providing real-time visibility of test outcomes to the development team.
- Spearheaded the design and implementation of comprehensive test strategies for critical payment APIs, ensuring seamless transaction processing.
- Driving the migration of legacy Ruby-based API tests to Postman, improving efficiency, consistency, and maintainability, while making it easier for new team members to update the scripts and track changes.

Senior Software Development Engineer in Test,

January 2023 – May 2024 | Malta, Malta

Red Acre Ltd. (via Symphony Solutions)

- Established and defined standards for end-to-end tests for services in the NestJS project, specifically for the affiliates feature.
- Collaborated with product owners and developers to ensure a comprehensive understanding of intended features and functionality, leading to improved test coverage.
- Provided guidance and mentorship to junior SDETs and QA engineers on testing tools, processes, and troubleshooting strategies, fostering a culture of continuous learning and improvement within the team.
- Ensured all automated testing activities adhered to strict company standards, maintaining high quality and consistency.
- Developed and executed detailed test plans for both new features and bug fixes, ensuring thorough validation and reliability of the software.

Software Test Engineer, Accelerator App

April 2021 – January 2023 | Portugal

- Upon joining the team, increased integration test coverage (API tests) by over 100% using Jest on the Node.js, GraphQL, and MongoDB projects, showcasing a proactive approach to enhancing product stability.
- Enhanced regression testing efficiency by implementing end-to-end tests for critical user journeys using Cypress within the CI/CD pipeline, resulting in a significant reduction in test execution time.
- Implemented a practice of promptly writing tests to reproduce reported bugs, facilitating quicker bug resolution, and established a strategy of writing tests before API implementation, resulting in faster development cycles and better code quality, which was subsequently adopted by the team.
- Ensured test suite relevance and accuracy by regularly updating end-to-end regression tests to align with feature updates and bug resolutions.
- Led the implementation of the Role-Based Access Control (RBAC) permission system on the backend, driving its development, and delivering a client-centric solution that empowered users to create custom roles with tailored permissions on the app, thereby enhancing user experience and security measures.
- Conducted regular performance tests using k6 to see how the platform handles different levels of network traffic. This helped us figure out the right amount of resources needed to keep the server running smoothly.

BBST Volunteer Instructor, Association for Software Testing

March 2020 – July 2021

- Observed and evaluated students' performance based on students' participation in assignments and classwork.
- Keeping students engaged by sharing information, and reminders on course work, and participation.

Software Test Analyst, *Softcom Ltd.*

March 2018 – April 2021 | Lagos, Nigeria

- I consistently kept managers and stakeholders in the loop about critical issues. This dedication earned me recognition as the Software Tester of the Year and the CEO’s Outstanding Performance Award in 2019.
- As a major contributing tester, I played a key role in testing the early versions of the Eyowo payment app, across Android, iOS, web, and USSD platforms, ensuring rigorous evaluation of functionality and performance to lay a solid foundation for subsequent development and deployment phases. This version was instrumental in processing over 1 billion naira in transactions within months.
- As the lead tester for UseForms, I led a team of testers to ensure the reliability of a data collection app used by agents to gather over 500K+ data points, including location data, for organizations like MTN, NBC, and NPower.
- I employed a strategic approach to identify significant problems early in product development; and proactively addressed potential issues by combining Risk-based and Functional testing techniques with a tailored Session-based test approach.
- By creating clear and concise bug reports via JIRA, I significantly minimized developer disputes regarding bugs, reducing them to nearly zero.

EDUCATION

Computer Science, *University of Ilorin*

November 2010 – July 2014 | Ilorin, Nigeria

SKILLS

AWS Services | Cypress | JavaScript | TypeScript | NodeJS | Exploratory Testing | Functional Testing |
Bug Investigation and Reporting | Test Documentation and Reporting | Web and Mobile App Testing | React JS |
Rest API Testing | GraphQL API Testing | Git | CI/CD with GitHub Actions | Postman API Automation |
Selenium For Web | MongoDB | Java | PostgreSQL | Redis | Playwright | Python

AWARDS

CEO’s Outstanding Performance Award, *Softcom Ltd.*

December 2019

Software Tester of the Year, *Softcom Ltd.*

December 2019

CERTIFICATES

AWS Certified Cloud Practitioner 	Black Box Software Testing (Foundations)
AWS	Association for Software Testing
